

Recycled Paper

Specification Sheet

A matt, white woodfree machine finished paper with good opacity, very good absorption and toner bonding characteristics, made from 100% Post Consumer Waste (PCW). The paper is bleached without chlorine. The adhesive is a general purpose permanent, acrylic based adhesive. It is characterized by high tack, excellent adhesion and good low temperature performance on a wide variety of substrates.

To the best of our knowledge this product does not contain any Substances of Very High Concern (SVHC) (revision 21st January 2025) over a limit of 0.1% (w/w).
