

# FILE CREATION GUIDE

## DIGITAL GOLD / SILVER FOIL + DIGITAL SPOT GLOSSY VARNISH\*

### FILE SETTINGS

We recommend using Adobe Illustrator, InDesign, etc.

- Format: PDF (1 file containing all layers)
- Colour mode: CMYK
- Bleed: 2 mm minimum
- Recommended resolution: 300 dpi
- Typography: outlined or embedded

### DIGITAL FOIL + SPOT VARNISH: INSTRUCTIONS

Effect: Combination of gold or silver metallic foil and varnish applied to specific areas

#### Technical instructions:

- Create a spot colour named "Spotlack" for the spot varnish elements
- Create a spot colour named "Folie" for the foil elements
- Enable overprint mode for these spot colours
- Minimum thickness of the elements you want to be digitally foiled: 0.3 mm
- Space between elements: 0.7 mm for the spot varnish / 0.4 mm for the foiling
- Safety margin: 0.2 mm minimum
- Create the label's cut line in spot colour, with the name "Stanze"

✗ Avoid thin text (minimum 3 mm thick), overly detailed lines, or cropped edges.

\*Available on Matt Paper when you select a matt varnish finish or White, Clear & Silver Plastic when you select a matt varnish or matt lamination finish.

### Margins

-  Bleed: 2mm
-  Cutting line
-  Safety margin: 0.2mm minimum
